Subject index

Methods and constructs

Theoretical

Computational methods for electronic structure

Thomas–Reiche–Khun populations in X–CH_3 and X–C_2H_5 series of molecules, M.E. Zitto, M.C. Caputo, M.B. Ferraro and P. Lazzeretti 259 (2000) 1

Ab initio study of the reaction mechanism of singlet and triplet N_2O and their intersystem crossing, D.-Y. Hwang and A.M. Mebel 259 (2000) 89

Conical intersections and photoreactions of 2*H*-azirines, C. Bornemann and M. Klessinger 259 (2000) 263

-CI and valence bond approach

Photodynamics of ethylene: ab initio studies of conical intersections, M. Ben-Nun and T.J. Martínez 259 (2000) 237

-perturbative and many body approaches

Topological effects in molecular systems: an attempt towards a complete theory, M. Baer 259 (2000) 123

Conical intersections induced by repulsive $^1\pi\sigma^*$ states in planar organic molecules: malonaldehyde, pyrrole and chlorobenzene as photochemical model systems, A.L. Sobolewski and W. Domcke 259 (2000) 181

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)

Thomas–Reiche–Khun populations in X–CH_3 and X–C_2H_5 series of molecules, M.E. Zitto, M.C. Caputo, M.B. Ferraro and P. Lazzeretti 259 (2000) 1

Radiative (incl. relativistic) effects on molecules and molecular processes

Topological effects in molecular systems: an attempt towards a complete theory, M. Baer 259 (2000) 123

PII: S0301-0104(00)00264-0

Scattering of waves and particles
A recursive Kohn variational algorithm for the Green's operator: application to the T-matrix, D. Brown 259 (2000) 11
Topological effects in molecular systems: an attempt towards a complete theory, M. Baer 259 (2000) 123

Collisional and reactive molecular dynamics with non-frictional forces
Topological effects in molecular systems: an attempt towards a complete theory, M. Baer 259 (2000) 123
The geometric phase effect in chemical reactions, S. Adhikari and G.D. Billing 259 (2000) 149

Reactive molecular dynamics including dissipative processes
Quantum dynamics of model proton-coupled electron transfer reactions, S. Shin and S.-I. Cho 259 (2000) 27
Production processes of H(D) atoms in the reactions of $NO(A^2\Sigma^+)$ with C_2H_2, C_2H_4, H_2O, and their isotopic variants, H. Umemoto, N. Terada, K. Tanaka, T. Takayanagi, Y. Kurosaki and K. Yokoyama 259 (2000) 39
Quasi-classical trajectory simulations of C + NO crossed molecular beam experiments, S. Andersson, N. Marković and G. Nyman 259 (2000) 99
Relaxation processes in singlet O_2 analyzed by laser-induced gratings, W. Hubschmid and B. Hemmerling 259 (2000) 109

Intramolecular dynamics
Singularities in the Hamiltonian at electronic degeneracies, A.J.C. Varandas and Z.R. Xu 259 (2000) 173
Quantum and semiclassical dynamics of the Franck–Condon wave packet on the coupled potential surfaces of the $\widetilde{X}\,^2A'/\widetilde{A}\,^2A'$ conical intersection, F. Santoro, C. Petrongolo, G. Granucci and M. Persico 259 (2000) 193
A model study of the wavepacket dynamics around a Jahn–Teller conical intersection in a symmetric charge-transfer system, A. Ferretti, A. Lami and G. Villani 259 (2000) 201
Nonadiabatic wave packet dynamics on the coupled $\widetilde{X}^2A_1/\widetilde{A}^2B_2$ electronic states of NO_2 based on new ab initio potential energy surfaces, S. Mahapatra, H. Köppel, L.S. Cederbaum, P. Stampfuß and W. Wenzel 259 (2000) 211
Effect of a dissipative environment on the dynamics at a conical intersection, A. Kühl and W. Domcke 259 (2000) 227
Conical intersections in molecular photochemistry – the role of phase change, S. Zilberg and Y. Haas 259 (2000) 249
Twin states and conical intersections in linear polyenes, W. Fuß, Y. Haas and S. Zilberg 259 (2000) 273
Femtosecond secondary emission arising from the nonadiabatic photoisomerization in rhodopsin, S. Hahn and G. Stock 259 (2000) 297

Statistical computational methods (incl. Monte Carlo)
Eigenvalue spectrum of the survival probability of excitation in nonradiative energy transport, E.N. Bodunov, M.N. Berberan-Santos, E.J. Nunes Pereira and J.M.G. Martinho 259 (2000) 49

Experiment

Molecular spectroscopy

-UV

Twin states and conical intersections in linear polyenes, W. Fuß, Y. Haas and S. Zilberg 259 (2000) 273

Photon counting and phase fluorimetry

Eigenvalue spectrum of the survival probability of excitation in nonradiative energy transport, E.N. Bodunov, M.N. Berberan-Santos, E.J. Nunes Pereira and J.M.G. Martinho 259 (2000) 49

Multiphoton ionization

Conical intersections, pseudorotation and coherent oscillations in ultrafast photodissociation of group-6 metal hexacarbonyls, S.A. Trushin, W. Fuß and W.E. Schmid 259 (2000) 313

Laser induced fluorescence

Production processes of H(D) atoms in the reactions of NO($A^2\Sigma^+$) with C_2H_2, C_2H_4, H_2O, and their isotopic variants, H. Umemoto, N. Terada, K. Tanaka, T. Takayanagi, Y. Kurosaki and K. Yokoyama 259 (2000) 39
Determination of single-site absorption spectrum in dye-doped disordered materials by double site-selective spectroscopy, Y. Ichino, Y. Kanematsu, A. Kurita and T. Kushida 259 (2000) 63

Ultrafast measurements

Energy dissipation and relaxation processes in deoxy myoglobin after photoexcitation in the Soret region, Y. Kholodenko, M. Volk, E. Gooding and R.M. Hochstrasser 259 (2000) 71
Twin states and conical intersections in linear polyenes, W. Fuß, Y. Haas and S. Zilberg 259 (2000) 273
Dihydroazulene/vinylheptafulvene photochromism: dynamics of the photochemical ring-opening reaction, J. Ern, M. Petermann, T. Mrozek, J. Daub, K. Kuldová and C. Kryschi 259 (2000) 331

Nonlinear optics and spectroscopy

Relaxation processes in singlet O_2 analyzed by laser-induced gratings, W. Hubschmid and B. Hemmerling 259 (2000) 109

Objects

Bulk systems

Gases

Relaxation processes in singlet O_2 analyzed by laser-induced gratings, W. Hubschmid and B. Hemmerling 259 (2000) 109
The geometric phase effect in chemical reactions, S. Adhikari and G.D. Billing 259 (2000) 149

Twin states and conical intersections in linear polyenes, W. Fuß, Y. Haas and S. Zilberg 259 (2000) 273

Liquid mixtures and solutions

Eigenvalue spectrum of the survival probability of excitation in nonradiative energy transport, E.N. Bodunov, M.N. Berberan-Santos, E.J. Nunes Pereira and J.M.G. Martinho 259 (2000) 49

Twin states and conical intersections in linear polyenes, W. Fuß, Y. Haas and S. Zilberg 259 (2000) 273

Dihydroazulene/vinylheptafulvene photochromism: dynamics of the photochemical ring-opening reaction, J. Ern, M. Petermann, T. Mrozek, J. Daub, K. Kuldová and C. Kryschi 259 (2000) 331

Polymers

Determination of single-site absorption spectrum in dye-doped disordered materials by double site-selective spectroscopy, Y. Ichino, Y. Kanematsu, A. Kurita and T. Kushida 259 (2000) 63

Biological systems

Energy dissipation and relaxation processes in deoxy myoglobin after photoexcitation in the Soret region, Y. Kholodenko, M. Volk, E. Gooding and R.M. Hochstrasser 259 (2000) 71

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)

A recursive Kohn variational algorithm for the Green's operator: application to the T-matrix, D. Brown 259 (2000) 11

Ab initio study of the reaction mechanism of singlet and triplet N_2O and their intersystem crossing, D.-Y. Hwang and A.M. Mebel 259 (2000) 89

A model study of the wavepacket dynamics around a Jahn–Teller conical intersection in a symmetric charge-transfer system, A. Ferretti, A. Lami and G. Villani 259 (2000) 201

Molecules (neutral and ionic)

Thomas–Reiche–Khun populations in $X–CH_3$ and $X–C_2H_5$ series of molecules, M.E. Zitto, M.C. Caputo, M.B. Ferraro and P. Lazzeretti 259 (2000) 1

Eigenvalue spectrum of the survival probability of excitation in nonradiative energy transport, E.N. Bodunov, M.N. Berberan-Santos, E.J. Nunes Pereira and J.M.G. Martinho 259 (2000) 49

Singularities in the Hamiltonian at electronic degeneracies, A.J.C. Varandas and Z.R. Xu 259 (2000) 173

Conical intersections induced by repulsive $^1\pi\sigma^*$ states in planar organic molecules: malonaldehyde, pyrrole and chlorobenzene as photochemical model systems, A.L. Sobolewski and W. Domcke 259 (2000) 181

Conical intersections and photoreactions of 2*H*-azirines, C. Bornemann and M. Klessinger 259 (2000) 263

-diatomic

Quasi-classical trajectory simulations of C + NO crossed molecular beam experiments, S. Andersson, N. Marković and G. Nyman 259 (2000) 99

The geometric phase effect in chemical reactions, S. Adhikari and G.D. Billing 259 (2000) 149

-small polyatomics
Production processes of H(D) atoms in the reactions of $NO(A^2\Sigma^+)$ with C_2H_2, C_2H_4, H_2O, and their isotopic variants, H. Umemoto, N. Terada, K. Tanaka, T. Takayanagi, Y. Kurosaki and K. Yokoyama 259 (2000) 39
Quantum and semiclassical dynamics of the Franck–Condon wave packet on the coupled potential surfaces of the $\widetilde{X}\,^2A'/\widetilde{A}\,^2A'$ conical intersection, F. Santoro, C. Petrongolo, G. Granucci and M. Persico 259 (2000) 193
Nonadiabatic wave packet dynamics on the coupled $\widetilde{X}\,^2A_1/\widetilde{A}\,^2B_2$ electronic states of NO_2 based on new ab initio potential energy surfaces, S. Mahapatra, H. Köppel, L.S. Cederbaum, P. Stampfuß and W. Wenzel 259 (2000) 211
Photodynamics of ethylene: ab initio studies of conical intersections, M. Ben-Nun and T.J. Martínez 259 (2000) 237

-other large
Dihydroazulene/vinylheptafulvene photochromism: dynamics of the photochemical ring-opening reaction, J. Ern, M. Petermann, T. Mrozek, J. Daub, K. Kuldová and C. Kryschi 259 (2000) 331

-polymeric and biological
Femtosecond secondary emission arising from the nonadiabatic photoisomerization in rhodopsin, S. Hahn and G. Stock 259 (2000) 297

Molecular aggregates
Conical intersections, pseudorotation and coherent oscillations in ultrafast photodissociation of group-6 metal hexacarbonyls, S.A. Trushin, W. Fuß and W.E. Schmid 259 (2000) 313

Free radicals (incl. hydronium and muonium)
Quasi-classical trajectory simulations of C + NO crossed molecular beam experiments, S. Andersson, N. Marković and G. Nyman 259 (2000) 99
Nonadiabatic wave packet dynamics on the coupled $\widetilde{X}\,^2A_1/\widetilde{A}\,^2B_2$ electronic states of NO_2 based on new ab initio potential energy surfaces, S. Mahapatra, H. Köppel, L.S. Cederbaum, P. Stampfuß and W. Wenzel 259 (2000) 211

Ions and charge carriers
Quantum dynamics of model proton-coupled electron transfer reactions, S. Shin and S.-I. Cho 259 (2000) 27

Phenomena

Molecular structure
Ab initio study of the reaction mechanism of singlet and triplet N_2O and their intersystem crossing, D.-Y. Hwang and A.M. Mebel 259 (2000) 89

Electronic structure and states
Effect of a dissipative environment on the dynamics at a conical intersection, A. Kühl and W. Domcke 259 (2000) 227

Photodynamics of ethylene: ab initio studies of conical intersections, M. Ben-Nun and T.J. Martínez 259 (2000) 237

Molecular interactions

A recursive Kohn variational algorithm for the Green's operator: application to the T-matrix, D. Brown 259 (2000) 11

Spectral bandshapes and intensities

Determination of single-site absorption spectrum in dye-doped disordered materials by double site-selective spectroscopy, Y. Ichino, Y. Kanematsu, A. Kurita and T. Kushida 259 (2000) 63

Nonadiabatic wave packet dynamics on the coupled $\widetilde{X}\,^2A_1/\widetilde{A}\,^2B_2$ electronic states of NO_2 based on new ab initio potential energy surfaces, S. Mahapatra, H. Köppel, L.S. Cederbaum, P. Stampfuß and W. Wenzel 259 (2000) 211

Coupling of electronic and nuclear motion

Quantum dynamics of model proton-coupled electron transfer reactions, S. Shin and S.-I. Cho 259 (2000) 27

Determination of single-site absorption spectrum in dye-doped disordered materials by double site-selective spectroscopy, Y. Ichino, Y. Kanematsu, A. Kurita and T. Kushida 259 (2000) 63

Singularities in the Hamiltonian at electronic degeneracies, A.J.C. Varandas and Z.R. Xu 259 (2000) 173

Quantum and semiclassical dynamics of the Franck–Condon wave packet on the coupled potential surfaces of the $\widetilde{X}\,^2A'/\widetilde{A}\,^2A'$ conical intersection, F. Santoro, C. Petrongolo, G. Granucci and M. Persico 259 (2000) 193

A model study of the wavepacket dynamics around a Jahn–Teller conical intersection in a symmetric charge-transfer system, A. Ferretti, A. Lami and G. Villani 259 (2000) 201

Nonadiabatic wave packet dynamics on the coupled $\widetilde{X}\,^2A_1/\widetilde{A}\,^2B_2$ electronic states of NO_2 based on new ab initio potential energy surfaces, S. Mahapatra, H. Köppel, L.S. Cederbaum, P. Stampfuß and W. Wenzel 259 (2000) 211

Photodynamics of ethylene: ab initio studies of conical intersections, M. Ben-Nun and T.J. Martínez 259 (2000) 237

Femtosecond secondary emission arising from the nonadiabatic photoisomerization in rhodopsin, S. Hahn and G. Stock 259 (2000) 297

Energy transfer processes

Eigenvalue spectrum of the survival probability of excitation in nonradiative energy transport, E.N. Bodunov, M.N. Berberan-Santos, E.J. Nunes Pereira and J.M.G. Martinho 259 (2000) 49

Energy dissipation and relaxation processes in deoxy myoglobin after photoexcitation in the Soret region, Y. Kholodenko, M. Volk, E. Gooding and R.M. Hochstrasser 259 (2000) 71

Relaxation processes in singlet O_2 analyzed by laser-induced gratings, W. Hubschmid and B. Hemmerling 259 (2000) 109

Molecular photophysical processes
Conical intersections induced by repulsive $^1\pi\sigma^*$ states in planar organic molecules: malonaldehyde, pyrrole and chlorobenzene as photochemical model systems, A.L. Sobolewski and W. Domcke 259 (2000) 181
Femtosecond secondary emission arising from the nonadiabatic photoisomerization in rhodopsin, S. Hahn and G. Stock 259 (2000) 297

Photochemistry
Photodynamics of ethylene: ab initio studies of conical intersections, M. Ben-Nun and T.J. Martínez 259 (2000) 237
Conical intersections in molecular photochemistry – the role of phase change, S. Zilberg and Y. Haas 259 (2000) 249
Conical intersections and photoreactions of 2*H*-azirines, C. Bornemann and M. Klessinger 259 (2000) 263
Femtosecond secondary emission arising from the nonadiabatic photoisomerization in rhodopsin, S. Hahn and G. Stock 259 (2000) 297
Conical intersections, pseudorotation and coherent oscillations in ultrafast photodissociation of group-6 metal hexacarbonyls, S.A. Trushin, W. Fuß and W.E. Schmid 259 (2000) 313
Dihydroazulene/vinylheptafulvene photochromism: dynamics of the photochemical ring-opening reaction, J. Ern, M. Petermann, T. Mrozek, J. Daub, K. Kuldová and C. Kryschi 259 (2000) 331

Intramolecular dynamics
Energy dissipation and relaxation processes in deoxy myoglobin after photoexcitation in the Soret region, Y. Kholodenko, M. Volk, E. Gooding and R.M. Hochstrasser 259 (2000) 71
Quantum and semiclassical dynamics of the Franck–Condon wave packet on the coupled potential surfaces of the $\widetilde{X}\,^2A'/\widetilde{A}\,^2A'$ conical intersection, F. Santoro, C. Petrongolo, G. Granucci and M. Persico 259 (2000) 193
A model study of the wavepacket dynamics around a Jahn–Teller conical intersection in a symmetric charge-transfer system, A. Ferretti, A. Lami and G. Villani 259 (2000) 201

Reactions (incl. dissociation)
Ab initio study of the reaction mechanism of singlet and triplet N_2O and their intersystem crossing, D.-Y. Hwang and A.M. Mebel 259 (2000) 89
The geometric phase effect in chemical reactions, S. Adhikari and G.D. Billing 259 (2000) 149
Conical intersections in molecular photochemistry – the role of phase change, S. Zilberg and Y. Haas 259 (2000) 249
Conical intersections, pseudorotation and coherent oscillations in ultrafast photodissociation of group-6 metal hexacarbonyls, S.A. Trushin, W. Fuß and W.E. Schmid 259 (2000) 313

-collisional
Production processes of H(D) atoms in the reactions of $NO(A^2\Sigma^+)$ with C_2H_2, C_2H_4, H_2O, and their isotopic variants, H. Umemoto, N. Terada, K. Tanaka, T. Takayanagi, Y. Kurosaki and K. Yokoyama 259 (2000) 39
Quasi-classical trajectory simulations of C + NO crossed molecular beam experiments, S. Andersson, N. Marković and G. Nyman 259 (2000) 99

Electron transfer
Quantum dynamics of model proton-coupled electron transfer reactions, S. Shin and S.-I. Cho 259 (2000) 27
A model study of the wavepacket dynamics around a Jahn–Teller conical intersection in a symmetric charge-transfer system, A. Ferretti, A. Lami and G. Villani 259 (2000) 201

Proton and hydrogen atom transfer
Quantum dynamics of model proton-coupled electron transfer reactions, S. Shin and S.-I. Cho 259 (2000) 27

Isotopic effects
Production processes of H(D) atoms in the reactions of $NO(A^2\Sigma^+)$ with C_2H_2, C_2H_4, H_2O, and their isotopic variants, H. Umemoto, N. Terada, K. Tanaka, T. Takayanagi, Y. Kurosaki and K. Yokoyama 259 (2000) 39

Biomolecular structure–function relationships
Energy dissipation and relaxation processes in deoxy myoglobin after photoexcitation in the Soret region, Y. Kholodenko, M. Volk, E. Gooding and R.M. Hochstrasser 259 (2000) 71
